

900MHz/FM RETRO Wireless Receiver

The Broadcastvision Entertainment dual-band 900MHz and FM wireless Retro receiver receives crystal clear audio from 900MHz and FM transmitters. The Retro receiver is a dual-band receiver so it can receive both 900MHz and FM signals and is compatible with Broadcastvision Entertainment brand transmitters as well as: Cardio Theater, Cardiovision, MYE and Fantaay 900MHz and/or FM transmitters.

The Retro receiver is easily attached to any piece of cardio equipment and has multiple mounting configurations. It can be powered by plugging into the CSAFE port on the cardio equipment or into a standard 110v outlet. The Retro has a bright, low-glare red LED channel display, is easy to use and can be programmed to accept up to 52 channel presets.
